

KOLINA'S SIX CAPITALS

The following six capitals are fundamental to Kolina's strive to be innovative and sustainable in its efforts to give water a second chance.

NATURE & CLIMATE CHANGE

- Reduces eutrophication to natural water sources and protects aquatic life
- Lower carbon footprint to mitigate effects to the environment
- Allows for circular economy and extends the lifetime of water

SOCIAL & PEOPLE

- Our technology is inherently safe to operate and environmentally considerate
- Chemical free treatment and reduces dependency on chemical usage
- No noise or odour

INTELLECTUAL & FINANCIAL

- Smart treatment system with full automation and remote telemetry
- Cost-effective alternative to current solutions on the market
- No extensive civil work required
